Independent Auditors' Report

To the Board of Directors of Bionime Corporation

Opinion

We have audited the consolidated financial statements of Bionime Corporation (" the Company") and its subsidiaries ("the Group"), which comprise the consolidated balance sheets as of December 31, 2023 and 2022, the consolidated statement of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2023 and 2022, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the International Financial Reporting Standards ("IFRSs"), International Accounting Standards ("IASs"), Interpretations developed by the International Financial Reporting Interpretations Committee ("IFRIC") or the former Standing Interpretations Committee ("SIC") endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Auditor and Aetestation Engagrments of Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matters to be communicated in our report.

1. Revenue recognition

   The accounting principle of revenue recognition, refer to consolidated financial statements Note 4 (m); The explanation about revenue recognition, refer to consolidated financial statements Note 6 (u).

Description of key audit matters:

The Group's revenue are from sales of blood glucose meter and test strips to domestic and foreign clients such as hospitals, dealers and pharmacies. Most of them are foreign clients. As industry peculiarities, clients in higher latitude countries tend to purchase more and increase their inventory at the end of the year in order to prevent the risk of paralysis of shipment due to frozen water in the winter. As a result, the revenue at the end of the year is higher causing the transactions before and after the balance sheet date to have material impact on financial reporting.

Therefore, testing whether revenue was recognized in the correct period is one of our key audit matters.

How the matter was addressed in our audit

Our principal audit procedures included: testing the Group's efficacy on the design and operation of internal controls surrounding revenue, which includes confirming the terms in the sales contract to ensure the revenue is being recorded accurately; selecting the sales transaction before and after the balance sheet date on a sample basis, inspecting the related accounting documents, as well as evaluating whether the revenue is recorded in the appropriated period.

2. Assessment of Inventory

The accounting principle of inventory, refer to consolidated financial statements Note 4 (h)"inventories", the assessment of accounting estimate and assumption uncertainty, refer to consolidated financial statements Note 5 (a); the explanation of inventory assessment refers to consolidated financial statements Note 6 (e).

Description of key audit matters:

The Group's inventories are measured at the lower of cost and net realizable value. However, the cost of inventory might exceed its net realizable value due to the rapid advancement in technology and the changes in market demand. Therefore, inventory evaluation is one of our key audit matters.

How the matter was addressed in our audit

Our principal audit procedures included: assessing the Group's allowance amount of inventory according to its characteristics; including conducting sampling to examine accuracy of inventory aging; assessing the Group's inventory decline or rationality of debt ratio; examine accuracy of allowance amount of inventory past for past years, and comparing with this period, in order to assess whether estimation method for this period is presented fairly.

3. Assessment of Intangible Assets impairment

For the accounting principle of Intangible Assets-Patent, assessment on accounting estimate and assumption uncertainty, and explanation of Intangible Assets assessment, please refers to Note 4 (k) "Intangible Assets", Note 5 (b), and Note 6 (h), respectively.

Description of key audit matters:

Since the Group's Intangible Assets- Patent at fair value amounted to $628,559 thousand, the management assessed the impairment test based on the provisions of International Accounting Standards No. 36 "Assets impairment". As the cash generating units determine the recoverable amount relating to future annual budget estimates, this subjective judgment is an accounting estimate with highly estimated uncertainty. Therefore, the Group's intangible assets have been identified as one of our key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included:
Assessing the reasonableness of the evaluation methods and assumptions used by the management and the calculation of the recoverable amount to ensure they are similar to the Company's current situation and the industry to which it belongs, and whether they are re-executed and checked.

Other Matter

The Company has prepared its parent-company-only-financial statements as of and for the years ended December 31, 2023 and 2022, on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the IFRSs, IASs, IFRIC, SIC, endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the audit committee) are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Yen-Hui Chen and Shyb-Huar, Kuo.

BIONIME CORPORATION AND SUBSIDIARIES

Notes to the Consolidated Financial Statements

For the years ended December 31, 2023 and 2022

(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

(1) Company history

Bionime Corporation (the "Company") was incorporated in April 14, 2003 as a Company limited by shares and registered under the Ministry of Economic Affairs, R.O.C. The Company's common shares were listed on the Taiwan Stock Exchange (TWSE) in December 2010. The address of the Company registered office is No.100, Sec. 2, Daqing St., South Dist., Taichung City, Taiwan. The Group primarily is involved in the manufacturing and selling medical instruments, providing biotechnology services, examining pharmaceuticals, and selling precision instruments.

(2) Approval date and procedures of the consolidated financial statements

The consolidated financial statements were authorized for issue by the Board of Directors on March 14, 2024.

(3) New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2023:

- Amendments to IAS 1 "Disclosure of Accounting Policies"
- Amendments to IAS 8 "Definition of Accounting Estimates"
- Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"

(b) The impact of IFRS endorsed by the FSC but not yet effective

The Group assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2024, would not have a significant impact on its consolidated financial statements:

- Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"
- Amendments to IAS 1 "Non-current Liabilities with Covenants"
- Amendments to IAS 7 and IFRS 7 "Supplier Finance Arrangements"
- Amendments to IFRS 16 "Lease Liability in a Sale and Leaseback"

(Continued)

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The Group does not expect the following new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its consolidated financial statements:

- Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- IFRS 17 " Insurance Contracts" and amendments to IFRS 17 " Insurance Contracts"
- Amendments to IAS21 "Lack of Exchangeability"

(4) Summary of material accounting policies

The material accounting policies presented in the consolidated financial statements are summarized below. Except for those specifically indicated, the following accounting policies were applied consistently throughout the periods presented in the consolidated financial statements.

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (hereinafter referred to as "the Regulations") and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations endorsed by the Financial Supervisory Commission, R.O.C.

(b) Basis of preparation

(i) Basis of measurement

Except for the following significant accounts, the consolidated financial statements have been prepared on a historical cost basis:

1) Financial assets at fair value through profit or loss (Available-for-sale financial assets) are measured at fair value.

2) The defined benefit assets are measured at fair value of the plan assets less the present value of the defined benefit obligation.

(ii) Functional and presentation currency

The functional currency of each Group is determined based on the primary economic environment in which the entities operate. The consolidated financial statements are presented in New Taiwan Dollars(NTD), which is the Company' s functional currency. All financial information presented in NTD has been rounded to the nearest thousand.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

(c) Basis of consolidation

(i) Principle of preparation of the consolidated financial statements

The consolidated financial statements comprised of the Company and subsidiaries. Subsidiaries are entities controlled by the Group. The Group ‘controls’ an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which the control ceases. Intragroup balances and transactions, and any unrealized income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. The Group attributes the profit or loss and each component of other comprehensive income to the owners of the parent and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumstances. Changes in the Group’s ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received will be recognized directly in equity, and the Group will attribute it to the owners of the parent.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

(d) Foreign currencies

(i) Foreign currency transaction

Transactions in foreign currencies are translated into the respective functional currencies of the Group at exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of translation.

Exchange differences are generally recognized in profit or loss, except for those differences relating to the investment in equity securities designated as at fair value through other comprehensive income, which are recognized in other comprehensive income.

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into the presentation currency at the average rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Group disposes of only a part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interest. When the Group disposes of only a part of its investment in an associate of joint venture that includes a foreign operation while retaining significant or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

When the settlement of a monetary receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, Exchange differences arising from such a monetary item that are considered to form part of the net investment in the foreign operation are recognized in other comprehensive income.

(e) Classification of current and non-current assets and liabilities

An asset is classified as current under one of the following criteria, and all other assets are classified as non-current.

(i) It is expected to be realized, or intended to be sold or consumed , in the normal operating cycle;

(ii) It is held primarily for the purpose of trading;

(iii) It is expected to be realized within twelve months after the reporting period; or

(Continued)

(iv) The asset is cash or a cash equivalent (as defined in IAS 7), unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current under one of the following criteria, and all other liabilities are classified as non-current.

An entity shall classify a liability as current when:

(i) It is expected to be settled in the normal operating cycle;

(ii) It is held primarily for the purpose of trading;

(iii) It is due to be settled within twelve months after the reporting period; or

(iv) The Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.

(f) Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits which meet the above definition and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes should be recognized as cash equivalents.

(g) Financial instruments

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Group becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at amortized cost; Fair value through other comprehensive income (FVOCI) – financial assets; or FVTPL.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL：

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Fair value through other comprehensive income (FVOCI)

Equity investments at FVOCI are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to profit or loss.

Dividend income is recognized in profit or loss on the date on which the Group’s right to receive payment is established.

3) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost or FVOCI described as above (e.g. financial assets held for trading and those that are managed and whose performance is evaluated on a fair value basis) are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

4) Impairment of financial assets

The Group recognizes its loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, amortized costs, notes and trade receivable, other receivable, guarantee deposit paid and other financial assets).

(Continued)

The Group measures its loss allowances at an amount equal to lifetime expected credit loss (ECL), except for the following which are measured as 12-month ECL：

- debt securities that are determined to have low credit risk at the reporting date；and
- other debt securities and bank balances for which the credit risk (e.g. the risk of default occurs beyond the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit assessment as well as forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Group considers a financial asset to be in default when the financial asset is more than 361 days past due or the debtor is unlikely to fully pay its credit obligations to the Group in full.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial instrument.

12-month ECL are the portion of ECL that resulting from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECL is the maximum contractual period over which the Group is exposed to credit risk.

ECL are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive). ECL are discounted at the effective interest rate of the financial asset.

At each reporting date, the Group assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial assets is credit-impaired includes the following observable data：

- significant financial difficulty of the borrower or issuer；
- a breach of contract such as a default or being more than 1 year past due；

- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider；
- it is probable that the borrower will enter bankruptcy or other financial reorganization；or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For corporate customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

5) Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group enters into transactions whereby it transfers assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

(ii) Financial liabilities and equity instruments

1) Classification of debt or equity

Debt and equity instruments issued by the Group are classified as financial liabilities or equity in accordance with the substance of the contractual agreements and the definitions of a financial liability and an equity instrument.

2) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

3) Treasury shares

When shares recognized as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs, is recognized as a deduction from equity. Repurchased shares are classified as treasury shares. When treasury shares are sold or reissued subsequently, the amount received is recognized as an increase in equity, and the resulting surplus or deficit on the transaction is recognized in capital surplus or retained earnings (if the capital surplus is not sufficient to be written down).

4) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

5) Derecognition of financial liabilities

The Group derecognizes a financial liability when its contractual obligation are discharged or cancelled, or expired. The Group also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability removed and the consideration paid (including any non-cash assets transferred or extinguished assumed) is recognized in profit or loss.

6) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(h) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is calculated using the weighted-average method and includes the expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.
Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(i) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that future economic benefits associated with the expenditure will flow to the Group.

(iii) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives for the current and comparative years of significant items of property, plant and equipment are as follows:

1) buildings and structures:5~50 years

2) machinery and equipment:2~8 years

3) molding equipment:2~3 years

4) transportation equipment:5 years

5) leasehold improvements:2~8 years

6) office and other equipment:3~5 years

Buildings and structures constitute mainly of building, wastewater treatment plant, and others. Each such part depreciates based on its useful life of 50 years, 30 years, and 5 years, respectively.

Depreciation methods, useful lives, and residual values are reviewed at each reporting date and adjusted if appropriate.

(j) Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(Continued)

(i) As a lessee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- there is a change in future lease payments arising from the change in an index or rate; or
- there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee; or
- there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset, or
- there is a change of its assessment on whether it will exercise an extension or termination option; or
- there is any lease modification

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Group accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Group presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases of the offices and other sporadic leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

As a practical expedient, the Group elects not to assess whether all rent concessions that meets all the following conditions are lease modifications or not:

- the rent concessions occurring as a direct consequence of the COVID-19 pandemic;
- the change in lease payments that resulted in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- any reduction in lease payments that affects only those payments originally due on, or before, June 30, 2022; and
- there is no substantive change in other terms and conditions of the lease.

In accordance with the practical expedient, the effect of the change in the lease liability is reflected in profit or loss in the period in which the event or condition that triggers the rent concession occurs.

(ii) As a lessor

When the Group acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Group recognizes lease payments received under operating leases as income on a straight-line basis over the lease term as part of ‘other income’.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

(k) Intangible assets

(i) Recognition and measurement

Expenditure on research activities is recognized in profit or loss as incurred.

Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Group intends to, and has sufficient resources to, complete development and to use or sell the asset. Otherwise, it is recognized in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost, less accumulated amortization and any accumulated impairment losses.

Other intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

(ii) Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

(iii) Amortization

Except for Patent, amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use.

The estimated useful lives for the current and comparative periods are as follows:

1) Computer software: 1~5 years

The amortization expertise is recognized as profit or loss based on the estimated total production quantity using the units of production amortization method.

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(l) Impairment of non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating unit (CGU)s.

(Continued)

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

For other assets other than goodwill, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(m) Revenue

(i) Revenue from contracts with customers

Revenue is measured based on the consideration to which the Group expects to be entitled in exchange for transferring goods or services to a customer. The Group recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Group's main types of revenue are explained below.

1) Sale of goods

The Group manufactures and sells blood glucose meter and test strips to medical equipment companies, pharmacies and hospitals. The Group recognizes revenue when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products.

Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

A receivable is recognized when the goods are delivered as this is the point in time that the Group has a right to an amount of consideration that is unconditional.

2) Financing components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

(n) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

(ii) Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(o) Share-based payment

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognized as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognized is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

Grant date of a share-based payment award is the date which the board of directors authorized the price and number of a new award.

(p) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or those recognized directly in equity or other comprehensive income, all current and deferred taxes are recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes are recognized expect for the following:

(i) temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and at the time of the transaction (i) affects neither accounting nor taxable profits (losses) at the time of the transaction and (ii) does not give rise to equal taxable and deductible temporary differences;

(ii) temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

(iii) taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognized for the carry forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if the following criteria are met:

(i) the Group has a legally enforceable right to set off current tax assets against current tax liabilities; and

(ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:

1) the same taxable entity; or

2) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

(r) Earnings per share

The Group discloses the Company's basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted-average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potential dilutive ordinary shares, such as convertible bonds and employee stock options.

(s) Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group). Operating results of the operating segment are regularly reviewed by the Group's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Each operating segment consists of standalone financial information.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty

In preparing these consolidated financial statements, management has made judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year is as follows:

(a) Valuation of inventories

As inventories are stated at the lower of cost or net realizable value, the Group estimates the net realizable value of inventories for obsolescence and unmarketable items at the end of the reporting period and then writes down the cost of inventories to net realizable value. The net realizable value of the inventory is mainly determined based on assumptions as to future demand within a specific time horizon. Due to the rapid industrial transformation, there may be significant changes in the net realizable value of inventories. Please refer to note 6 (e) for further description of the valuation of inventories.

(b) Assessment of Intangible Assets impairment

In the process of evaluating the potential impairment of tangible and intangible assets other than goodwill, the Group's management is required to make subjective judgments in determining the independent cash flows, expected future income and expenses related to the specific asset of the Group, taking into account the nature of the industry. Any changes in these estimates based on changed economic conditions or business strategies could result in significant impairment charges or reversal in future years. Please refer to note 6 (h) for key assumptions used in the recoverable amount.

(6) Explanation of significant accounts

(Continued)

The Group is dedicated to developing its new product called Continuous Glucose Monitoring (CGM). For the year ended December 31, 2019, the product has met the criteria for capitalization. The CGM developed by the Group received the second-level medical device license approval notice issued by Taiwan Food and Drug Administration on October 13, 2023, resulting in the Group's capitalized cost of $628,559 thousand to be reclassified to Patent and amortized using the units of production amortization method.

(i) Amortization

The amortization of intangible assets are included in the statement of comprehensive income for the years ended December 31, 2023 and 2022 were as follows:

	2023	2022
Operating costs	**$ 1,312**	**1,025**
Operating expenses	**$ 10,783**	**10,045**

(ii) Impairment loss

The amount of recoverable future cash flows from the combined Company's expertise is based on the estimates of financial budgets approved by the management, wherein the appropriate valuation methods and assumptions are used to calculate the recoverable amount of the cash generating units. The discount rate used on December 31, 2023 was 14%. According to the impairment test results of the Group, the recoverable amount of the Patent is greater than its carrying amount; hence, no impairment loss was recognized in 2023.

(iii) Disclosures on pledges

As of December 31, 2023 and 2022, none of the intangible assets of the Group had been pledged as collateral.

6) Sensitivity analysis

As of December 31, 2023 and 2022 the impact on the present value of the defined benefit obligation, due to the change in actuarial assumption, was as follows:

	Influences of defined benefit obligation	
	Increase 1.00%	**Decrease1.00%**
December 31, 2023		
Discount rate	$ (3)	5
	Increase 1.00%	**Decrease1.00%**
Future salary increases rate	5	(3)

	Influences of defined benefit obligation	
	Increase 0.25%	**Decrease0.25%**
December 31, 2022		
Discount rate	$ (139)	146
	Increase 1.00%	**Decrease1.00%**
Future salary increases rate	619	(514)

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of pension liabilities in the balance sheets.

There were no changes in the method and assumptions used in the preparation of sensitivity analysis for 2023 and 2022,.

(ii) Defined benefit plans

The Group allocates 6% of each employee's monthly wages to the labor pension personal account at the Bureau of the Labor Insurance in accordance with the provisions of the Labor Pension Act. Under this defined contribution plan, the Group allocates a fixed amount to the Bureau of the Labor Insurance without additional legal or constructive obligations.

The pension costs incurred from the defined contribution plan have been contributed to the Bureau of the Labor Insurance. The amounts of $2,159 thousand and $2,184 tthousand for the years ended December 31, 2023 and 2022, respectively were transferred to intangible assets as they were eligible for capitalization, please refer to note 6(h), and the remaining pension costs are $23,556 thousand and $21,669 thousand separately.

Other subsidiaries established their retirement plans in accordance with each local regulation. The Group recognized the pension costs of $9,650 thousand and $9,222 thousand in 2023 and 2022,, respectively.

	$ 1,208,821	**1,302,633**

According to the R.O.C. Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, the capital increase by transferring capital surplus in excess of the par value should not exceed 10% of the total common stock outstanding.

The company has determined to distribute $104,580 thousand and $45,451 thousand as cash dividends out of APIC (Additional Paid-In Capital) on May 10 ,2023 and Marcht 22, 2022 with approval subjected to the stockholders' meeting, respectively.

(iii) Retained Earnings

The Company's article of incorporation stipulates that Company's net earnings should first be used to offset the prior years' deficits, if any, before paying any income taxes. Of the remaining balance, 10% is to be appropriated as legal reserve, and then any remaining profit together with any undistributed retained earnings shall be distributed according to the distribution plan proposed by the Board of Directors and submitted to the stockholders’ meeting for approval.

According to the Company Act, the distribution of dividends and bonus, or all or part, of legal reserve and capital reserve, distributed by way of cash, shall be decided during the board meeting approved by more than half of the directors, with two thirds of directors in attendance;thereafter, to be reported at the shareholders' meeting.

The Company's dividend policy depends on the Company's capital expenditure budget and required working capital. The remaining earnings will be distributed either in cash or in stock dividends, or both. However, the cash dividend cannot be less than 5% of the total dividends distributed.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

1) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

2) Special reserve

During the earnings of distribution, the amount to be reclassified as a special reserve (which does not qualify for earnings distribution) should be equal to the total net current-period reduction of other shareholders' equity in accordance with the regulation of Taiwan Stock Exchange Authority. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

3) Earnings distribution

The amounts of cash dividends on the appropriations of earnings for 2022 and 2021 had been approved during the board meeting on May 10, 2023 and March 22, 2022, respectively. The relevant dividend distributions to shareholders were as follows:

	2022		2021	
	Amount per share	Total amount	Amount per share	Total amount
Dividends distributed to ordinary shareholders				
Cash	$ 0.38	23,105	1.25	75,753

The amounts of cash dividends on the appropriations of earnings for 2023 had been approved during the board meeting on March 14, 2024. The relevant dividend distributions to shareholders were as follows:

	2023		
	Amount per share	Total amount	
Dividends distributed to ordinary shareholders			
Cash	$ 2.00	122,003	(Note)

Note: Of the total amount, $116,208 thousand was used as capital reserve to distribute cash dividends.

(iv) Treasury shares

The Company failed to transfer to its employees the 2,000 thousand treasury shares it repurchased in 2017. According to the Securities Exchange Act, the shares should be retired if they were not transferred within five years after repurchasing.

The Company reduced its capital by repurchasing shares based on a resolution approved during the board meeting held on March 22, 2022. All relevant registration procedures had been completed on May 17, 2022.

BIONIME CORPORATION AND SUBSIDIARIES
Notes to the Consolidated Financial Statements

1) Determining the fair value of equity instruments granted

The Company used Black-Scholes method in measuring the fair value of the share-based payment at the grant date. The measurement inputs were as follows:

	2019 ESOP	
	2023	**2022**
Fair value at grant date	$22.53~25.83	22.53~25.83
Share price at grant date	60.2	60.2
Exercise price	53.6~55.1	55.1~56.7
Expected volatility(%)	38.50%	38.50%
Expected life (years)	10 years	10 years
Expected dividend	-	-
Risk-free interest rate(%)	0.54%	0.54%

Expected volatility is based on the weighted average of historical volatility, and it is adjusted when there is additional market information about the volatility. The Group determined the expected dividends and risk-free rate during the life of the option. These rates are determined based on government bonds, and they are in accordance with the regulations. Service and non-market performance conditions attached to the transactions are not taken into account in determining the fair value.

2) Description of share-based payment arrangements

(v) Employee compensation and directors' remuneration

In accordance with the articles of incorporation the Company should contribute no less than 1.5% of the profit as employee compensation and less than 3% as directors' and supervisors' remuneration when there is profit for the year. However, if the Company has accumulated deficits, the profit should be reserved to offset the deficit. The recipients of shares and cash may include the employees of the Company's affiliated companies who meet certain conditions.

For the year ended December 31, 2023 is the net loss before tax, so the remuneration of employee and directors was not estimated.

For the year ended December 31, 2022, the Company estimated its employee remuneration amounting to $11,850 thousand and directors remuneration amounting to $2,790 thousand respectively. The estimated amounts mentioned above are calculated based on the net profit before tax, excluding the remuneration to employees, directors of each period, multiplied by the percentage of remuneration to employees, directors as specified in the Company's articles. These remunerations were expensed under operating costs or operating expenses during 2023 and 2022. Related information would be available at the Market Observation Post System website. The amounts, as stated in the consolidated financial statements, are identical to those of the actual distributions for 2023 and 2022.

(x) Financial Instruments

(i) Credit risk

1) Credit risk exposure

The carrying amount of financial represents the maximum exposure to credit risk assets recognized in the consolidated balance sheet.

2) Concentration of credit risk

The major clients of Group are concentrated in medical instruments market. To minimize credit risk, the Group periodically evaluates their financial positions and requests collateral if deemed necessary. It also periodically assesses the recoverability of the trade receivable and recognizes an allowance for impairment. The impairment loss is within management' s expectation. As of December 31, 2023 and 2022, 63% and 71%, respectively, of trade receivables were comprised of five major customers. Thus, credit risk is significantly centralized.

3) Receivables and debt securities

For credit risk exposure of notes and trade receivables, please refer to note 6 (c).

Other financial assets at amortized cost includes other receivables and time deposits. For the details on loss allowance, please refer to note 6(d) and note 6 (i).

All of these financial assets are considered to have low risk, and thus, the impairment provision recognized during the period was limited to 12 months expected losses. Regarding how the financial instruments are considered to have low credit risk, please refer to note 4 (g).

(ii) Liquidity risk

The following table shows the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

The Group does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

(iii) Market risk

1) Currency risk

The Group's significant exposure to foreign currency risk was as follows:

	December 31, 2023			December 31, 2022		
	Foreign currency	Exchange rates	NTD	Foreign currency	Exchange rates	NTD
Financial assets						
Monetary items						
USD	USD13,021	30.76	400,526	USD21,255	30.74	653,379
EUR	EUR 2,635	34.04	89,695	EUR 2,402	32.76	78,690
Financial liabilities						
Monetary items						
USD	USD13,219	30.76	406,616	USD14,379	30.74	442,010
EUR	EUR 1,767	34.04	60,149	EUR 1,804	32.76	59,099

2) Sensitivity analysis

The Group's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, trade and other receivables, loans and borrowings; and trade and other payables that are denominated in foreign currency.

A strengthening (weakening) of 0.5% of the NTD against the USD and the EUR as of December 31, 2023 and 2022, would have (decreased) increased the net profit after tax by $92 thousand and $924 thousand, respectively.

3) Foreign exchange gain and loss on monetary items

Since the Group has many kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For the years 2023 and 2022, the foreign exchange gain (including realized and unrealized portions) amounted to $5,238 thousand and $(14,964) thousand, respectively.

(iv) Interest rate analysis

Please refer to the notes on liquidity risk management and interest rate exposure of the Group's financial assets a nd liabilities.

The following sensitivity analysis is based on the exposure to the interest rate risk of derivative and non-derivative financial instruments on the reporting date. Regarding assets with variable interest rates, the analysis is based on the assumption that the amount of assets outstanding at the reporting date was outstanding throughout the year. The rate of change is expressed as the interest rate increases or decreases by 0.5% when reporting to management internally, which also represents the Group management's assessment of the reasonably possible interest rate change.

If the interest rate had increased / decreased by 0.5%, the Group's net income would have increased / decreased by $10,785 thousand and $9,039 thousand for the year ended December 31, 2023 and 2022, respectively with all other variable factors remaining constant. This is mainly due to the Group's borrowing at variable rates.

(v) Fair value of financial instruments

1) Fair value hierarchy

The fair value of financial assets financial assets at fair value through other comprehensive income is measured on a recurring basis. The carrying amount and fair value of the Group's financial assets and liabilities, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, and lease liabilities, disclosure of fair value information is not required:

Notes to the Consolidated Financial Statements

2) Valuation techniques for financial instruments not measured at fair value :

The Group' s valuation techniques and assumptions used for financial instruments not measured at fair value are as follows:

If there is quoted price generated by transactions for financial liabilities at amortized cost, the recent transaction price and quoted price data is used as the basis for fair value measurement. However, if no quoted prices are available, the discounted cash flows are used to estimate fair values.

3) Transfers between Level 1 and Level 2

There were no transfers from one level to another level in 2023 and 2022.

4) Reconciliation of Level 3 fair values

	Fair value through other comprehensive income
	Unquoted equity instruments
Opening balance, January 1, 2023	$ 36,100

5) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include "fair value through other comprehensive income – equity investments".

Quantified information of significant unobservable inputs was as follows:

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive income-equity investments without an active market	Discounted Cash Flow Method	• Forecast annual revenue growth rate（December 31, 2023 and 2022 ; 25%~100%） • Weight average capital cost （December 31, 2023 and 2022 ; 9.92% abd 9.33%）	• the annual revenue growth rate was higher, the fair value was higher • the weight average capital cost was higher, the fair value was lower

(y) Financial Risk Management

(i) Overview

The Group is exposed to the following risks from its financial instruments:

1) Credit risk

2) Liquidity risk

3) Market risk

In this note expressed the information on risk exposure and objectives, policies and procedures of risk measurement and management. For detailed information, please refer to the related notes of each risk.

(ii) Structure of risk management

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. The Group' s Planning Department, which is responsible for developing and controlling the Group's risk management policies, periodically reports to the Board of Directors on its operation. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group' s activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations. The Group Audit Committee oversees how management monitors compliance with the Group' s risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(iii) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to financial instruments fails to meet its contractual obligations, and arise principally from the Group' s receivables from customers and investment in debt securities.

1) Trade and other receivables

The Group has established a credit policy, under which every new customer' s credit rating shall be analyzed before granting delivery and payment terms. The Group reviews external ratings, customers' general information, and other information. The Group grants credit line for each customer and carries out periodical reviews thereafter. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis. The Group has an allowance account for impairment to reflect the estimate of the losses on accounts receivable and other receivables that may be incurred.

(Continued)

2) Investments

The exposure to credit risk for bank deposits, fixed income investments, and other financial instruments is measured and monitored by the Group's finance department. The Group only deals with banks, other external parties, corporate organizations, government agencies and financial institutions with good credit rating. The Group does not expect any counterparty above fails to meet its obligations hence there is no significant credit risk arising from these counterparties.

3) Guarantee

The Group's policy is to provide financial guarantees only to wholly-owned subsidiaries. At December 31, 2023, no guarantees were outstanding (2022: none).

(iv) Liquidity risk

The Group manages sufficient cash and cash equivalents so as to cope with its operations and mitigate the effects of fluctuations in cash flows. The Group's management supervises the banking facilities and ensures compliance with the terms of loan agreements.

Loans and borrowings from the bank form an important source of liquidity for the Group. As of December 31, 2023 and 2022, the Group's unused credit lines were amounted to $1,003,852 thousand and $655,176 thousand, respectively.

(v) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

1) Currency risk

The Group is exposed to currency risk on sales, purchases, and borrowings that are denominated in a currency other than the respective functional currencies of in addition to keeping abreast of the trends and changes in major currencies in the international foreign exchange market, the Group flexibly adjusts its export quotations, and maintains a considerable position in foreign currency accounts receivable and payable to avoid currency risk.

2) Interest rate risk

The borrowing rate of the Group is agreed in accordance with the contract, and financing decisions are all approved by the Board of Directors.

3) Other market price risk

The Group is not exposed to equity price risk from its investments in equity securities.

(z) Capital Management

The Group's objectives for managing capital to safeguard its capacity to continue to operate, to continue provide a return on shareholders, to maintain the interest of other related parties, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the dividend payment to its shareholders, reduce the capital for redistribution to shareholders, issue new shares, or sell assets to settle any liabilities.

The Group and other entities in the same industry use the debt-to-equity ratio to manage capital. This ratio is the total net debt divided by the total capital. The net debt from the balance sheet is derived from the total liabilities less cash and cash equivalents. The total capital and equity include share capital, capital surplus, retained earnings, and other equity plus net debt.

As of December 31, 2023, the Group's capital management strategy is consistent with that of the prior year as of December 31, 2022 and the gearing ratio is maintained within 30% to 75% to ensure financing at reasonable cost. The Group's debt to equity ratio at the end of the reporting period was as follows:

(14) Disclosures required for securities firm investing in countries or regions without securities authority:

(a) General information

The Group has one reportable segment, the biotechnology segment. This segment is mainly involved in the manufacturing and selling of medical instruments, providing biotechnology services, examining pharmaceuticals products, and selling precision instruments.

(b) Information about reportable segments and their measurement and reconciliations

The Group uses the internal management report that the chief operating decision maker reviews as the basis to determine the resource allocation and make a performance evaluation. The internal management report includes profit before taxation.

The profit or loss of the reportable segment of the Group includes depreciation and amortization expenses, income tax expense (income), any extraordinary activity, and other material non-cash items. The reportable amount is similar to that of the report used by the chief operating decision maker.

Accounting policies for the operating segments correspond to those stated in note 4.

The reportable segment profit and loss, segment assets and segment liabilities of the Group are in accordance with the financial report, please refer to the Consolidated Balance sheet and Consolidated Statement of Comprehensive Income.

(c) Production and service information

Since the main industrial department of Group is the optical lens department, and its operating income, operating interests and the identifiable assets account for more than 90% of operating income and total assets, therefore, the Group is classified as a single product.
